

Booktracks®

Textbook Management

Protect Your Investment!

Textbook inventory is one of the largest investments a school makes. A school with 2,500 students can have as much as \$1 million in textbook inventory. Traditional manual methods of tracking textbook inventory is labor-intensive and time-consuming, leaving your school vulnerable to loss, damage, and uncollected fines.

On average, a district will experience an 8% loss in textbooks each year due to inadequate means of tracking. What are you doing to protect your investment?

Book Systems offers Booktracks, a total solution for managing and tracking textbooks and other instructional materials throughout the entire district. Booktracks helps you regain both control and accountability of your textbook inventory, while providing a significant return on your investment.

Benefits of Booktracks:

-  Streamlines distribution and collection
-  Reduces replacement costs
-  Holds students and teachers accountable
-  Forecasts needs based upon enrollment

Regain Control & Accountability

Built with Your Needs in Mind

Booktracks was developed specifically with a school system's special needs in mind. Export your student data from many popular administrative packages to get your textbook management system in operation quickly. Booktracks is a centralized Web-based application that is simple enough for a novice user with minimal training, while the robust functionality will please even the most advanced users. The high-level password security system allows only the right people to perform important administrative functions.

Calculator Worksheet

Total number of students:	<u>2,500</u>
Average number of textbooks per students: (Usually between 5-6)	<u>5</u>
Average cost of a textbook (\$60-\$80):	<u>\$70.00</u>
What percentage of your textbooks are lost annually? (Average is 8%)	<u>8%</u>
Potential Annual Loss:	<u>\$70,000</u>

"On average I spend between \$20,000 and \$40,000 each semester on replacement textbooks for our 11 schools. After just one semester of using Booktracks our requests for replacements were reduced to Zero! Booktracks is easy to use and has had an immediate impact on our return on investment."
